

## Herniamesh Srl expands its Surgical portfolio thanks to the acquisition, by

Herniamesh S.r.l. announces the acquisition by VMG Group, a premier Group specialist in the Surgical products. The transaction represents an important milestone in the Herniamesh development and growth. With the European Group's CHIRMAX Surgical business Herniamesh will strengthen its position in the Medical Devices market. The long-term strategy focused on combining organic growth with targeted strategic partnerships will drive us toward new important successes.

### About VMG

VMG is a specialized manufacturer of surgical products with a strong focus on innovation in the surgical field. VMG is known for its CDMO expertise (within cannula & drug delivery devices), as well as complete product platforms in Blood collection & Lab sample handling (they are the global leader in capillary tubes), Injectable drug delivery (they are a leading syringe manufacturer), Diabetes and Sutures.

This partnership significantly accelerates the development of the Chirmax Surgical business unit.

*"It was crucial for me that the heritage of my father, a renowned surgeon, continues to thrive. Together with the VMG Team, I am confident we will be faster in bringing new ideas to the market, and have a broader offering to better serve our partners, end-users and patients. I am looking forward to continuing to support the growth of Herniamesh within the VMG family."* **Lorena Trabucco, co-founder and owner of Herniamesh S.r.l.**

By combining the strengths of **Herniamesh and VMG**, we achieve three critical goals:

- **Portfolio Synergy:** A more comprehensive product offering. Hospitals and distributors gain access to a broader, fully integrated surgical portfolio, combining complementary technologies with consistent quality and strong „Made in Europe“ footprint – all from a single, trusted partner.
- **Improved market coverage and local support:** The established presence across the EU and Nordic Countries, together with an immediate operational base in Italy and additional markets, enables faster product availability, closer local support, and more responsive collaboration.
- **Innovative-driven growth:** We are accelerating innovation to help our partners improve clinical outcomes, streamline workflows, and increase efficiency-actively shaping the future of surgical care.
- **Market Expansion:** We are leveraging our presence while gaining an immediate foothold in different Countries.
- **Accelerated Growth:** We are no longer just participating in the market; we are challenging the status quo on a global scale.

*"By adding Herniamesh's high-quality, EU-manufactured complementary offering to our surgical portfolio, we move from being a "suture specialist" to a true Surgical solutions provider. We are excited to make this next step in expanding the breadth and scale of our surgical portfolio that will allow us to be a stronger challenger in the global surgical market."* **Marcin Siczek, CEO, Vitrex Medical Group.**
